

*Dear Willow Bend HOA,*

*I would like to bring you up to speed where we are at with the detail crew. First I'd like to thank everyone who has been patient as this cycle of detail was very in depth and thorough. The crew will finish the cycle this week. I expect a must faster turnaround now that the ladder work is completed. We will also have more time to concentrate on weeds and bed lines. Palm trees over fifteen feet will be scheduled for trimming in August, once they have finished seeding. Any further mulch will only be installed at the HOA or Landscape Committee's request. All irrigation repair request should go through Sentry. We have Tech's on site every Monday and Tuesday. I will do a final sod audit the last week of March and submit a proposal for the sod replacement. Once approved, it will only take a couple of weeks to schedule and complete the project. Thank you for working together to maintain and improve the landscape at Willow Bend!!*
